Our members = Your candidates

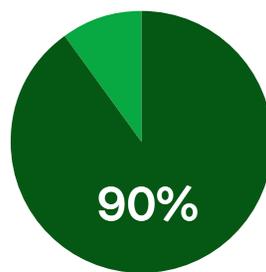

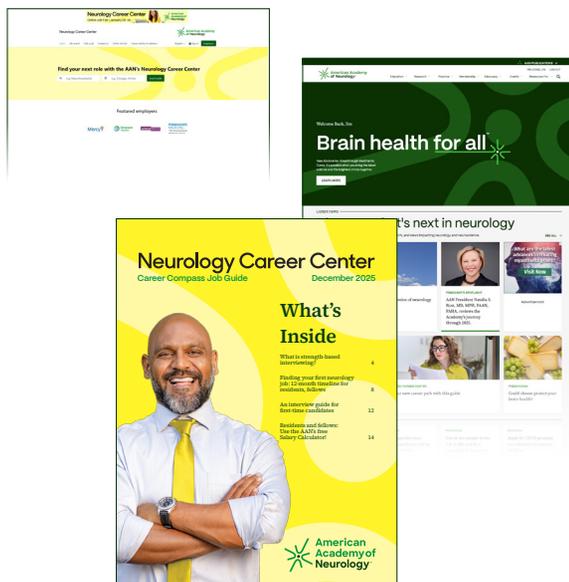

The American Academy of Neurology is the world's largest association of neurologists and neuroscience professionals, with more than 40,000 members dedicated to brain health for all.

- Over 90% of US neurologists are members of the AAN.
- US neurologist members average spending 73% of their time in clinical practice.
- 15% of US AAN members are in a residency or fellowship.
- 12% of US AAN member neurologists specialize in child neurology.

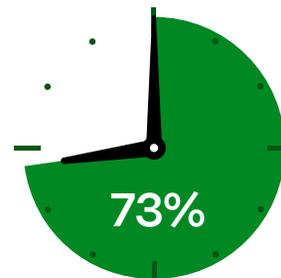

Neurologists are in demand

- Throughout most of the US, the current demand for neurologist services already exceeds supply.
- Demand for neurologists will increase due to the aging US population and increased use of neurological services.
- Neurologists just entering the workforce receive multiple offers; the typical AAN job seeker applies for five jobs and receives three offers before finishing a residency/fellowship.¹
